QUALITY ASSURANCE ENGINEER

Detail-oriented and highly skilled **QA Engineer** with extensive experience in **manual and automated testing**. Proficient in ensuring software quality through **test automation, performance testing, and CI/CD integration**. Strong analytical skills in **feature analysis and test scenario creation**, contributing to efficient and reliable software releases.

EXPERIENCES

PT. KOLTIVA **(March 2021 - Present)**

QA Engineer

Reponsibities

- Designed, developed, and maintained **Web Automation Frameworks** using **Java, Selenium WebDriver, and Cucumber (BDD)** to improve regression testing efficiency
  Create Web automation script with java and selenium
- Developed **Mobile Automation Frameworks** using **Java and Appium** for Android application testing.
- Built and maintained **API Automation Test Suites** using **JMeter** and validated REST APIs with **Postman**.
- Performed **Performance Testing** using Apache JMeter to evaluate application scalability and identify performance bottlenecks.
- Designed, reviewed, and executed comprehensive **test cases and test scenarios** based on business requirements.
- Performed **Smoke Testing, Functional Testing, Regression Testing, Integration Testing, and UAT support** across multiple product releases.
- Executed **manual testing** for newly developed features before automation implementation.
- Validated application data and backend functionality using **MySQL** queries.
- Collaborated closely with Developers, Product Managers, and Business Analysts to clarify requirements and resolve software defects.
- Logged, tracked, and verified defects using Jira throughout the Software Development Life Cycle (SDLC).
- Participated in Agile ceremonies including Sprint Planning, Daily Stand-up, Sprint Review, and Retrospective.

PT. Nusa Kreasi Cemerlang **(May 2019 - March 2021)**

Software Quality Assurance

Reponsibities

- Created and maintained detailed **test cases** based on functional and business requirements.Smoke test and regression test
- Executed **Manual Functional Testing**, **Smoke Testing**, **Regression Testing**, and **User Acceptance Testing (UAT)**.
- Performed **REST API testing** using Postman to validate request/response data and API functionality.
- Identified, documented, and tracked software defects until resolution.
- Worked closely with developers to reproduce issues and verify bug fixes.
- Participated in Agile development processes and sprint activities.
- Ensured software quality before production deployment through comprehensive test execution.

EDUCATION **(June 2012 - September 2018)**

UPN "Veteran" Jakarta

Bachelors of Information System

PROJECT

Koltitrace Shop	**(January 2023 - 2024)**
Koltitrace Lite FarmX	**(August 2022 - 2024)**
Koltiva Loan	**(March 2022 - August 2022)**
MARS Premium Point	**(July 2022 - August 2022)**
Koltipay	**(March 2021 - August 2021)**
Indomarco	**(November 2020 - March 2021)**
iMkas	**(Februari 2020 - November 2020)**
Storial	**(October 2019 - Februari 2020)**
Otto SFA	**(May 2019 - October 2020)**

SKILLS

Technincal Skills:

- Programming Language: Java, Typescript
- API Automation Frameworks: Jmeter, Postman
- Database: MySql

Tools/Software:

- Automation: Cucumber/BDD, Selenium, Appium, Playwright
- CI/CD: Jenkins, Gitlab CI
- Performance test: Jmeter
- Testcase Management: Testlink
- Project Management: Jira, Waffle
- Device Farm: Open STF, Browser Stack
